WEDNESDAY, OCTOBER 20, 1909.

SWINE OF THE ROAD.

The good roads movement in Virginia is meeting one class of enemies down the road, waves a gay sardonic

creature made in God's image. Scripture does not encourage even horsewhipping. But perhaps the farmer who shakes raging fists after a creature such as this, with a sudden passion for vengeance, hot and lusty. storming in his heart, will not be regarded by the church itself as utterly That these swine of the road violate

the law is the least part of their oftense. There are laws which decent men unwittingly break. But no man with the first germs of decency in hi make-up could ever be so wantonly and infamously indifferent to the rights of others, rendered bold only by the knowledge that he can escape at forty miles an hour. It is this of the road-hog's offense which passes all forgiveness. Here is no mutter of technical violation of the law. Here is a matter which strikes leeper, reaches down to the great wulf fixed between self-respecting hution of the sty. Therefore, offenses of this sort should be punished with in the penitentiary are doing much to break up joy-riding in the cities. ew fail-sentences would do much to teach manners to the porcine motorists on other men's rights and destroying their property is not looked upon with vor in Virginia.

Indignant complaint at the behavior the hogs trickles in from various arts of the State, and along with it there goes a most regrettable drift of sentiment. If good roads will bring us such visitors as these, say the farmers, then the less we see of good roads the better. We assure our friends in the country that the sympathles of all right-thinking people, let us say nine hundred and ninety nine one-thousandths of the people o Virginia, are wholly with them. But it is not a fact that the hogs multiply and as general or "through" use of their use promptly grows up and orderliness increases, rather than the contrary. In any case, it is poor business to burn down the house in order to good roads movement as hard as ever

published in 1875. Prior to that time the criminal had been looked upon as a roral outlaw. He was regarded as one who wilfully defied the laws of society from a sheer love of sin. Lambreso changed all this. He taught us to believe that the criminal is a distinct, type, marked by strong anatomical peculiarities and by fundamental psychological weaknesses, by exemplifying this theory; and by collecting thousands of measurements, and historical pageant, was rather a seventh for the dawning periods of knoopkirts, bustles, crinolines and merrywidows.

THE VORKTOWN CELEBRATION.

No vain pride in patriot ancestors and not ill a second that is being done by these solicities is far reaching and or great value, but it is a serious question whether if the amount necessary to build this hospital was in hand sould it be supported? There are few small towns, and not many large ones, where heavillables where heavillables one, and the good that is being done by these solicities is far reaching and or great value, but it is a serious question whether if the amount necessary to build this hospital was in hand sould it be supported? There are few small towns, and not many large ones, where heavillables one, and the good that is being done by these solicities is far reaching and or great value, but it is a serious question whether if the amount necessary to build this hospital was in hand sould it be supported? There are few small towns, and not many large ones, where heavillables one, and the good that is being done by these solicities is far reaching and or great value, but it is a serious question whether if the amount necessary to build this hospital was in hand sould it be supported? There are few small towns, and not many large ones, where heavillables one, and the good that is being a most worthy and laudeable one, and the good that is being done by these solicities is far reaching and

CLEARS THE COMPLEXION MAJESTIC MEN FOR VICEROYS

BY LA MARQUISE DE FONTENOY.

MONG the many arguments put forward in favor of the appointment of Field Marshal Love ment of Field Marshal Love Mitchener to the office of Viceroy of India, in succession to Lord Minto, are his imposing stature and rather stately alcofness. Nothing weights so much with the natives, irrespective of rank, as a presence impressive in its size and dignified in its bearing and manner. One of the secrets of Lord Curzon's success lay therein, as also in the pomp and ceremony with which he surrounded himself. True, he was ridiculed at home, as well as in this country, for affecting as Viceroy an even still greater amount of majesty than the sovereign whom he represented. But it vasity enhanced his prestige and his power of usefulness with the natives of India, and was warmly approved of by all those possessed of any knowledge of life in England's great Oriental empire. Viceroys of diminutive stature, such as, for instance, Lord Elgin, have always suffered on that account; and while tile late Lord Ripon may have been liked, he was not respected to the same degree by the native princes and people as was Lord Curzon.

Of no one, however, do the people in India retain a more profound impression than of the late Earl Mayo. He was a man of the most imposing physique, of stately carriage and manner, and although most charming and completely devoid of hauteur at home, inaugurated a policy of extraordinary exclusiveness in India, He would allow no native servants to wait upon tim, and at table was always attended by twenty-four gigantic English footmen, gorgeous in powder and livery. He would not even permit the attendance of the native bodyguard, whom he replaced by a troop of British cavalry, resplendent in shiny helmets, on rist arriving in India, he shut him self up for three weeks in his study with books relating to matters of etimes of the native bodyguard, whom he replaced by a troop of British cavalry, resplendent in shiny helmets, on the self up for three weeks in his study. With books rel

at first sight may appear to be insig-nificant details was that he was wor-shiped by the native, almost as a demigod, and possessed an amount of suthority and of prestige which none of his successors, with the possible cx-ception of Lord Curzon, has ever at-tained.

suthority and of prestige which none of his successors, with the possible exception of Lord Curzon, has ever attained.

Lord Minto is much too cordial in his dealings with the natives, and does not sufficiently realize the fact that you cannot treat Asiatics, and especially the people of India, in the same democratic way that won for him so many warm friends in Canada when Governor-General of the Dominion. Thus not long ago, when at Simia watching the polo game, he caught sight of a petty prince among the spectators in another portion of the field, and crossed the latter in order to greet him instead of summoning him to his side by one of his aldes-de-camp. Microvor, he approached him with a sweeping bow of his hat. The petty prince was quick to grasp the opportunity, and instead of responding in kind, content, ed himself with a curt nod to India's ruler, thereby enhancing his own reputation and prestige among all the natives present, while that of the Viceloy suffered in proportion. By the end of the week the story was all over india, and has not tended to make matters any easier for the English government among the 300,000,000 of Orientals by which the empire is peopled. If the matter were put to the vote of Englishmen acquainted with India, there would be a unanimous verdict to the effect that no man of less than six feet, in height and of corresponding power of India. Lord Minto, though a singularly gallant officer and an able administrator, does not fullii, these requirements, which should be carefully considered in the choice of his successor.

Obolenski in Disfavor.

Ot all the members of the household of Emperor Nicholas, there has been none until recently who stood higher in his favor than Major-General Prince Constantine Obolenski, one of tile friends of his boyhood, and with whom he has a slaways been on such terms of
